EDUCATION

University of California, Los Angeles (UCLA) — B.A. in Computer Science & Linguistics
Irvine Valley College — A.S. in Liberal Studies (Emphasis in Computer Science)

Expected June 2027
May 2025

TECHNICAL SKILLS

Programming Languages: Python, SQL, JavaScript, Java, TypeScript, HTML, CSS, C, C++
Frameworks & Tools: React, React Native, Expo, Leaflet.js, Figma, Git, Django
Backend/Data: PostgreSQL, SQLite, Supabase, REST APIs, JWT Auth

WORK EXPERIENCE

Software Engineer Intern, Testing Lab | TetraMem | San Jose, CA

June 2026 - Present

- Built a chip/PCB inventory and traceability system (Django, PostgreSQL) for a memristor test lab, managing ~500 assets and replacing spreadsheets across device, test, and finance teams.
- Modeled the physical test stack in a self-referential schema — chips → daughter cards → main boards → host test PCs — with lot/wafer traceability and mount-aware label transformations.
- Built per-core chip calibration file management, barcode-scanner serial lookup, and a full audit trail of check-outs, transfers, and status changes with per-event user and location snapshots.
- Automated fab and purchase-log spreadsheet ingest with a validating CSV pipeline that auto-derives lot, chip ID, and board type from lab labeling conventions.

AI Training Data Specialist | Handshake AI | Remote - Contract

Dec 2025 - May 2026

- Evaluated LLM outputs across reasoning, coding, and instruction-following tasks, flagging errors and contributing written rationale that directly shaped model fine-tuning pipelines and team evaluation guidelines.

PROJECTS

StudyBug | React Native, Expo, TypeScript, PostgreSQL, REST APIs, JWT Auth, Git

January 2026 - Present

- Shipped real-time study tracking to a cross-platform mobile app by integrating a TypeScript React Native client with a PostgreSQL backend through Supabase's REST API, eliminating manual session logging for beta users.
- Reduced cross-device sync delays from polling-based seconds to sub-second updates by replacing periodic refresh with Supabase real-time subscriptions over a JWT-authenticated session.
- Cut UI implementation time by ~30% per feature by translating Figma prototypes into reusable React Native components with custom animated SVG and haptic feedback hooks.
- Maintained a clean main branch across 50+ merged pull requests on a 5-person team by enforcing structured Git branching, mandatory code reviews, and conventional commit standards.

BruinPOV | JavaScript, HTML, CSS, Leaflet.js, Supabase, REST APIs, MediaRecorder API

February 2026

- Shipped a geo-anchored audio storytelling platform in a 12-hour hackathon, connecting a Leaflet.js map interface to a PostgreSQL backend through Supabase REST endpoints.
- Enabled in-browser voice recording and playback for 20+ pinned story locations by integrating the MediaRecorder API with chunked uploads to backend object storage.

Recipe Manager | React, JavaScript/TypeScript, Git Version Control, HTML, CSS, Agile/Scrum

Dec 2025

- Delivered a user-story-driven Recipe Manager on schedule across a 4-person team by owning component architecture for navigation, save/like toggles, and the collections page.
- Reduced regressions to near zero across two sprints by enforcing typed component props in TypeScript and participating in code reviews on every pull request.

LEADERSHIP

College Leap, Club

Irvine, CA

President

Jul 2024 – Jul 2025

- Grew membership 40% in one year by overhauling the event calendar around technical workshops and industry speaker sessions instead of generic socials.
- Ran weekly executive meetings and quarterly all-hands for a 5-officer team, owning agenda, action items, and follow-through across club operations.

CERTIFICATIONS & AFFILIATIONS

Eagle Scout Award (2023) · USC AI and Semiconductor Chips Program (2024) · UCLA ACM, Creative Labs, Claude Builder Club
